Design Without Limits

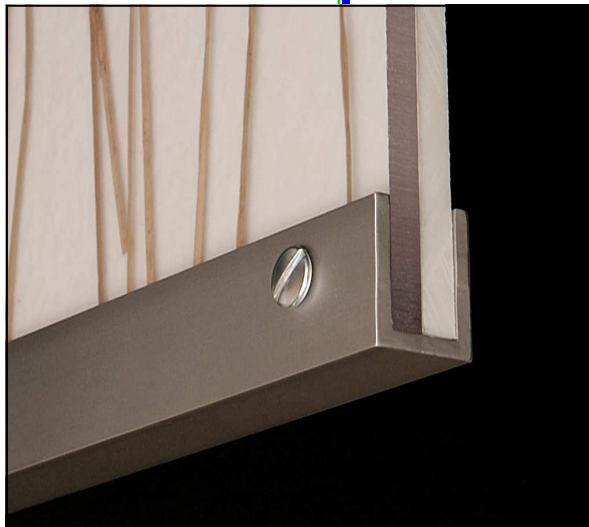

Audubon Panels

Our **Audubon Panel System** allows you to specify materials that coordinate with the design theme of your projects.

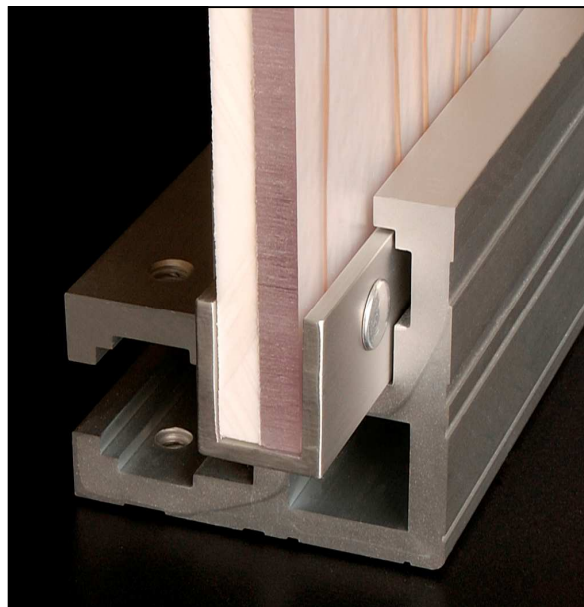

< Aluminum channel with waterproof backer board and decorative laminate. Post screws allow easy replacement of decorative skin to change the look or repair damage.

- Side panels can be made from hardwoods, designer resins, marble, slate, stainless steel and other metals, signboard or photographic panels (materials suitable for outdoor use available) .
- Panels may be etched with logos or directional signage.
- Can be used for Audubon Planters and Recyclers
- The modular design makes any part easily replaceable when you are ready to change your look or in case of damage. On-site staff can exchange parts with a screwdriver and an Allen key.

^ 3Form Bear Grass with PVC backer in channel.

Channel and panel slide into corner leg, and are fastened with two set screws. >
